AIHA[®] Releases Third Edition of *The Occupational Environment – Its Evaluation, Control and Management*

FAIRFAX, VA (October 31, 2011) — The American Industrial Hygiene Association[®] (AIHA) is pleased to announce the release of the third edition of “*The Occupational Environment – Its Evaluation, Control and Management*.” This AIHA publication is an essential core reference for occupational health and safety practitioners, educators, and students. The newly revised, two volume “White Book” includes comprehensive information on hazard recognition and evaluation, physical agents, the human environment, controlling the occupational environment, program management, and much more. The book has been updated to include the most current tools, methodologies, and knowledge available in a single OEHS reference.

Over 120 subject matter experts contributed to this edition. The chapters of Volume 1 focuses on the chemical aspects, air monitoring, and exposure and risk assessment strategies. Volume 2 includes content related to the physical hazards, control methods, and management aspects. New chapters have been added to cover nanotechnology, ethics, IH issues in construction, and the AIHA[®] Value Strategy business model. Many other topics have been expanded significantly including dermal exposure assessment, thermal stresses, ventilation, and ergonomics.

For more information on the third edition of “*The Occupational Environment – Its Evaluation, Control and Management*”, including how to order, please visit www.aiha.org/market.

Founded in 1939, the American Industrial Hygiene Association (AIHA) is the premier association of occupational and environmental health and safety professionals. AIHA’s 10,077 members play a crucial role on the front line of worker health and safety every day. Members represent a cross-section of industry, private business, labor, government and academia.
