

THE CENTER FOR CONSTRUCTION  
**RESEARCH AND TRAINING**

# Addressing Data Center FAQs

**January 29, 2026**

**Amber Trueblood, DrPH**, Data Center Director

**William Harris, MS**, Research Analyst

**Derek Dufoe, MS**, Research Assistant

# Housekeeping

- Today's webinar will be recorded and automatically shared via follow-up email.
- The recording and slides will also be posted on [cpwr.com/webinars](http://cpwr.com/webinars).
- Attendees are automatically muted! Please submit panelist questions via the Q&A box.
- Spanish audio is available via simultaneous interpretation

# Simultaneous Interpretation

# Interpretación simultánea

## WINDOWS - MAC (Navegador web/Browser)

1. En los controles del seminario web, haga clic en **Interpretación** 
2. Haga clic en el idioma que desee escuchar.
3. (Opcional) Para escuchar solo el idioma interpretado, haga clic en **Silenciar audio original**.

**Nota:** Hay que unirse al audio del seminario web a través de audio o VoIP de la computadora. No podrá escuchar la interpretación de idiomas si utiliza las funciones de audio de teléfono [llamada directa](#) o [recibir llamada](#).

## ANDROID - iOS (Aplicación móvil/Mobile App)

1. En los controles del seminario web, toque los puntos suspensivos ...
2. Toque **Interpretación de idiomas**.
3. Toque el idioma que desee escuchar.
4. (Opcional) Toque el botón de alternancia **Silenciar audio original**.
5. Haga clic en **Finalizado**.

**Nota:** No podrá escuchar la interpretación de idiomas si utiliza las funciones de audio de teléfono [llamada directa](#) o [recibir llamada](#).

1. *In your webinar controls, click **Interpretation** *
2. *Click the language that you would like to hear.*
3. *(Optional) To hear the interpreted language only, click **Mute Original Audio**.*

**Note:** You must join the webinar audio through your computer audio/VoIP. You cannot listen to language interpretation if you use the [dial-in](#) or [call me](#) phone audio features.

1. *In your webinar controls, tap the ellipses ...*
2. *Tap **Language Interpretation**.*
3. *Tap the language you want to hear.*
4. *(Optional) Tap the toggle to **Mute Original Audio**.*
5. *Click **Done**.*

**Note:** You cannot listen to language interpretation if you use the [dial-in](#) or [call me](#) phone audio features.

KEY DATA  
SOURCES

METHODS

COMMON  
Q&A

# Poll Questions

How familiar are you with CPWR's Data Center?

- a. Extremely familiar
- b. Very familiar
- c. Moderately familiar
- d. Slightly familiar
- e. Not familiar at all

Did you know we provide information on data sources and definitions in all CPWR Data Center publications?

- a. Yes
- b. No

# Data Center Products

## Data Bulletins

**CPWR**  **Data Bulletin**  **DECEMBER 2025**

**Occupational Exposures in Construction**  
William Harris, MS, Amber B. Trueblood, DrPH, Derek Dufoe, MS<sup>1</sup>

**OVERVIEW**  
Construction workers are exposed to a wide range of hazards, including harmful substances (lead, asbestos, silica dust), risky working positions (heights, cramped/ confined spaces), and environmental conditions (noise, extreme heat, working outdoors). These exposures can lead to injuries and chronic conditions that affect construction workers throughout their lives.

This Data Bulletin examines occupational, environmental, chemical, ergonomic, and physical exposures among construction workers using data by industry, common chemical substances, and blood lead levels. The data for exposures are drawn from the O\*NET Online Database, which collects data on work conditions and contexts for all occupations on a *rolling* basis and represents a baseline. Other exposure data comes from the U.S. Bureau of Labor Statistics' Occupational Requirements Survey (ORS), the U.S. Centers for Disease Control and Prevention National Health Interview Survey (NHIS), Occupational Safety and Health Administration Occupational Chemical Exposure Health Data, and National Institute for Occupational Safety and Health Adult Blood Lead Epidemiology and Surveillance (ABLES) data.

**THIS ISSUE**  
This issue examines common occupational exposures faced by construction workers, including hazardous equipment, working conditions, and materials by industry and year.

**KEY FINDINGS**  
Over one in three (37%) construction and extraction workers reported constantly working outside in 2024. *Chart 2*

Construction workers are at greater risk of encountering harmful conditions than non-construction workers, with an average exposure score 70% higher (73.2 versus 43.6). *Chart 6*

In 2024, 22.9% of construction workers reported exposure to hazardous chemicals for four or more hours per week compared to 6.7% of non-construction workers. *Chart 7*

From 2010 to 2023, there was a 57% decrease in the percentage of construction workers with elevated blood lead levels. *Chart 9*

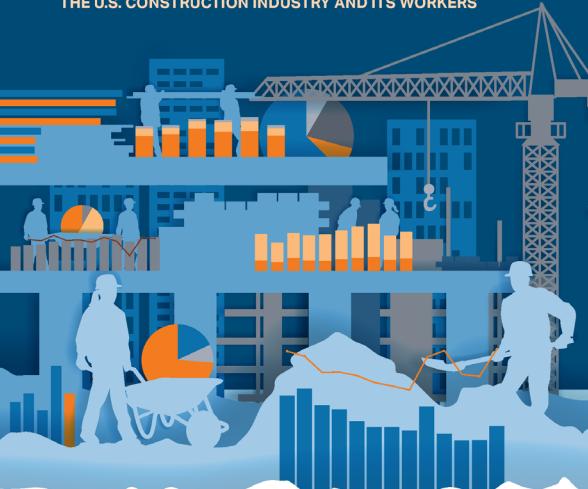

Construction workers were more likely to be exposed to high places (54.9 versus 44.0) than other workers. *Chart 10*

RESEARCH AND TRAINING

**Falls, Slips, and Trips in Construction**

**Fatal falls, slips, and trips, by year**

On average annually from 2011 to 2023:

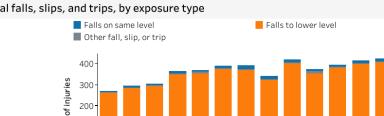

- 364 fatal falls, slips, and trips occurred in the construction industry with a rate of 3.5 injuries per 100,000 FTEs

**Fatal falls, slips, and trips, by exposure type**

On average annually from 2011 to 2023:

- Falls on same level: 11 injuries
- Falls to lower level: 348 injuries
- Other fall, slip, or trip: 5 injuries

**Fatal falls, slips, and trips by major subsector**

On average annually from 2011 to 2023: the number of injuries in each major subsector were:

- Construction of Buildings (NAICS 236): 84
- Heavy and Civil Engineering (NAICS 237): 18
- Specialty Trade Contractors (NAICS 238): 253

**Falls, slips, and trips among All Construction by detailed subsector**

On average annually from 2011 to 2023: the detailed subsectors<sup>8</sup> with the most falls, slips, and trips were:

- Foundation, structure, and building exterior contractors (NAICS 2381): 143
- Residential building construction (NAICS 2361): 55

**Chart Footnotes**

Please see the sections below the dashboard for information on the data, definitions, chart notes, recommendations, and sources.

# Key Data Sources

Main Category	Data Source
<b>Injuries, Illnesses, and other Health Data</b>	AHRQ, Medical Expenditure Panel Survey BLS, Census of Fatal and Occupational Injuries BLS, Survey of Occupational Illnesses and Injuries CDC, National Vital Statistics System, Mortality CDC, National Health Interview Survey NHTSA, Fatality Analysis Reporting System OSHA, Fatality Inspection Data OSHA, Severe Injury Reports
<b>Workplace Exposures</b>	OSHA, Chemical Exposure Health Data OSHA, Enforcement data Occupational Information Network BLS, Occupation Requirements Survey
<b>Workforce Demographic, Business, Economic Trends</b>	BLS, Current Employment Statistics BLS, Current Population Survey CPS Supplements (e.g., Contingent Worker) BLS, Employment Projections BLS, Occupational Employment and Wage Statistics U.S. Census Bureau, American Community Survey U.S. Census Bureau, Economic Census U.S. Census Bureau, County Business Patterns U.S. Census Bureau, Annual Business Survey U.S. Department of Labor, Projections Central

# Why so many data sources?

- We cover a wide range of topics in our publications and there is not one data source with all of this information together.

Industry,  
Business, &  
Owner

Employment,  
Income, &  
Benefits

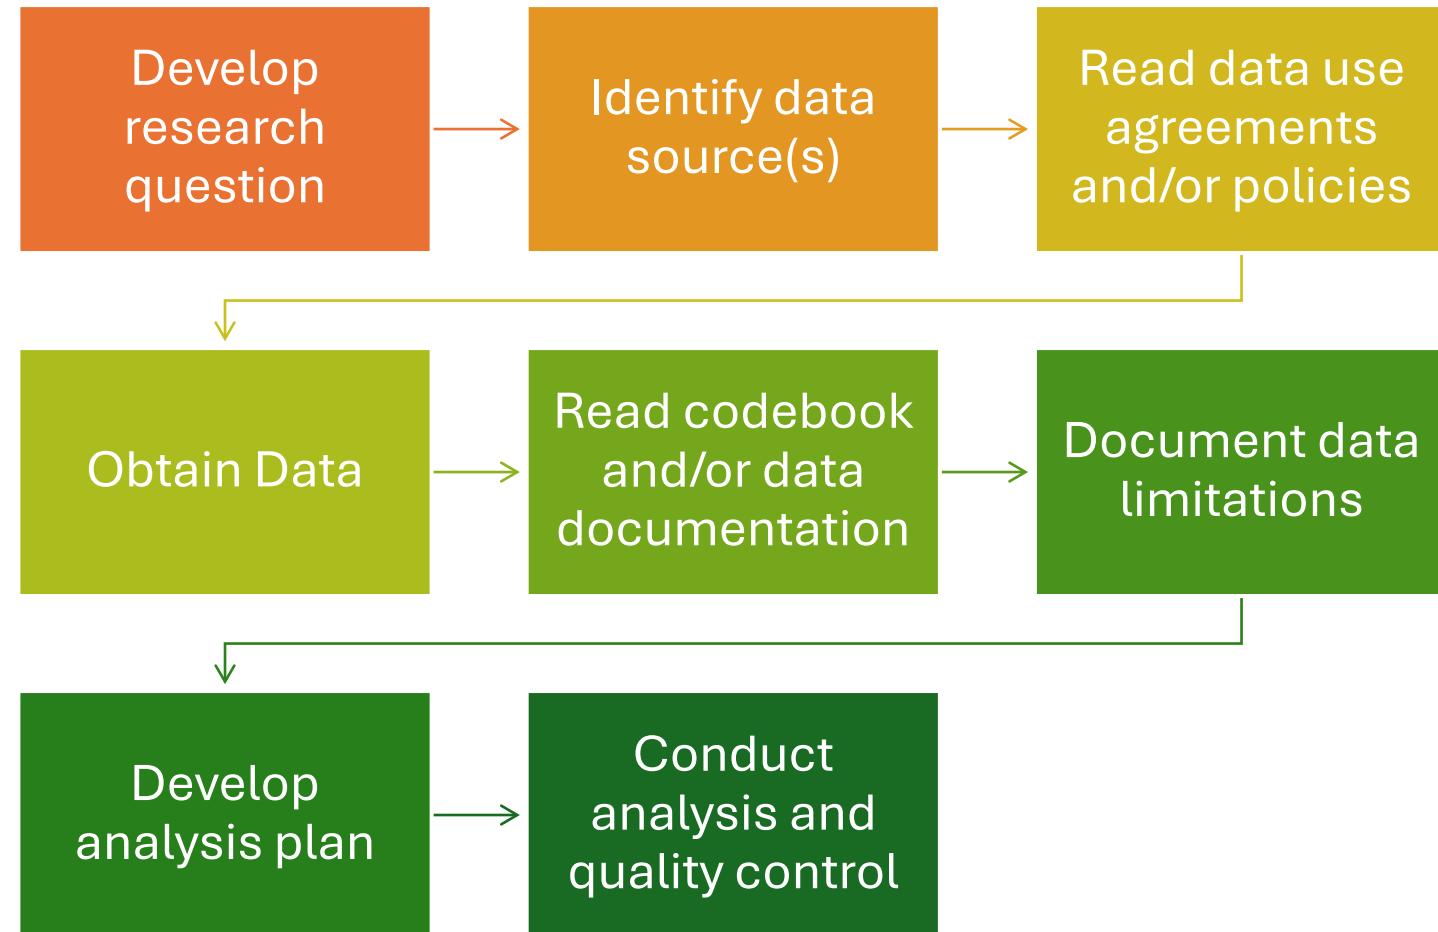

Injuries, Illnesses,  
& Other Health  
Outcomes

Hazards &  
Exposures

(interactive only)

# Methods

# Common Questions & Answers #1

- How do injury sources differ?
  - Representativeness
    - CFOI- All Workers.
    - SOII- Private wage-and-salary with trends for all workers available at higher levels.
    - OSHA- Representative of injuries required to be reported under state/Federal OSHA jurisdiction.
      - In Fiscal Year 2024 OSHA investigated [826 worker deaths](#).
      - BLS reported [5,283 fatal injuries](#) in calendar year 2023.
  - Type of Injuries
    - CFOI- Traumatic injuries.
    - OSHA Severe Injuries- Injuries resulting in hospitalization, loss of eye, or amputation.
    - OSHA ITA- Those requiring employer completed Form 300/300A/301.
    - SOII- Nonfatal injuries resulting in job transfer, restriction, or days away from work.
  - Industry, Occupation, and At Work Definitions Vary

# Common Questions & Answers #2

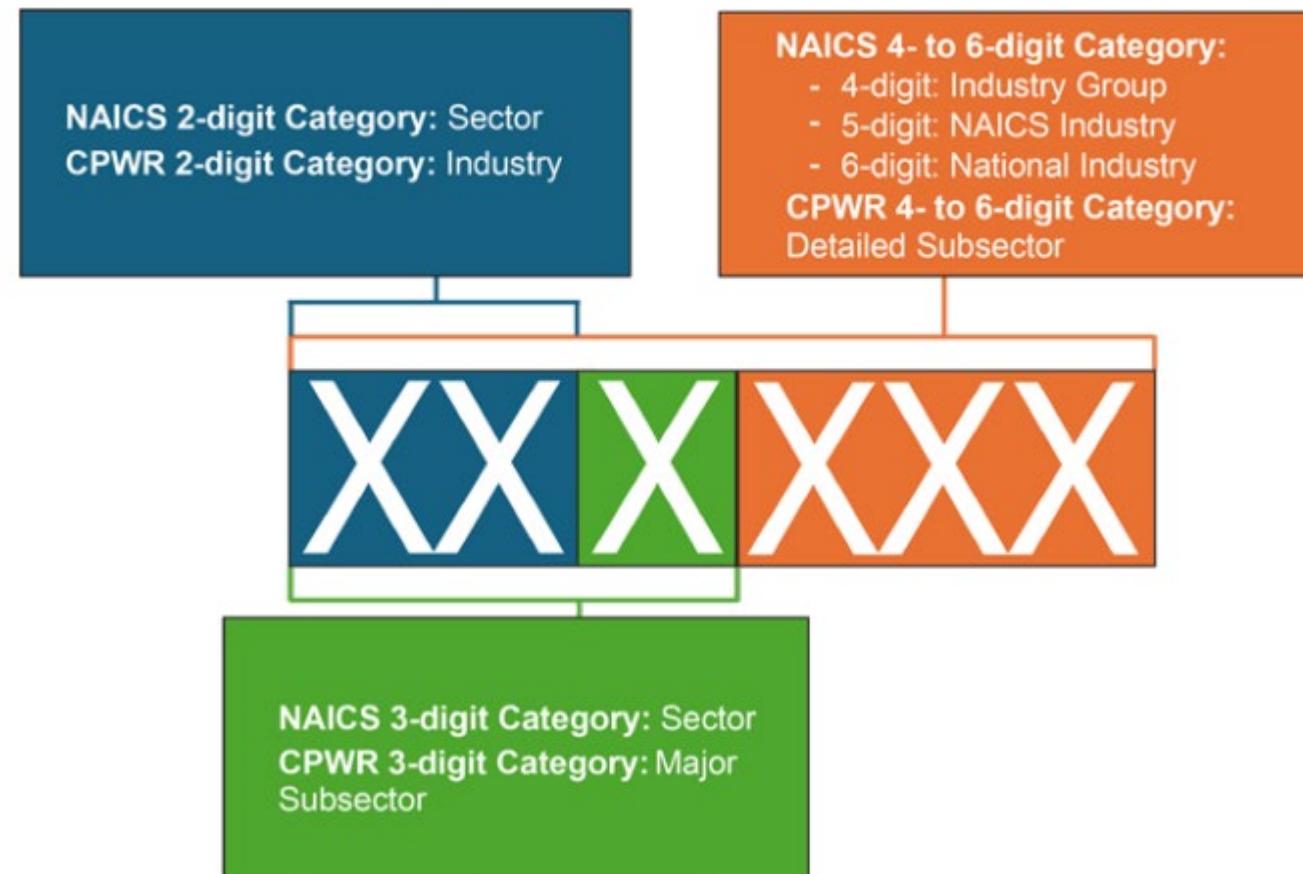

- How is at work defined for injuries and illnesses?
  - Source documents.
  - Self-reported.

# Common Questions & Answers #3

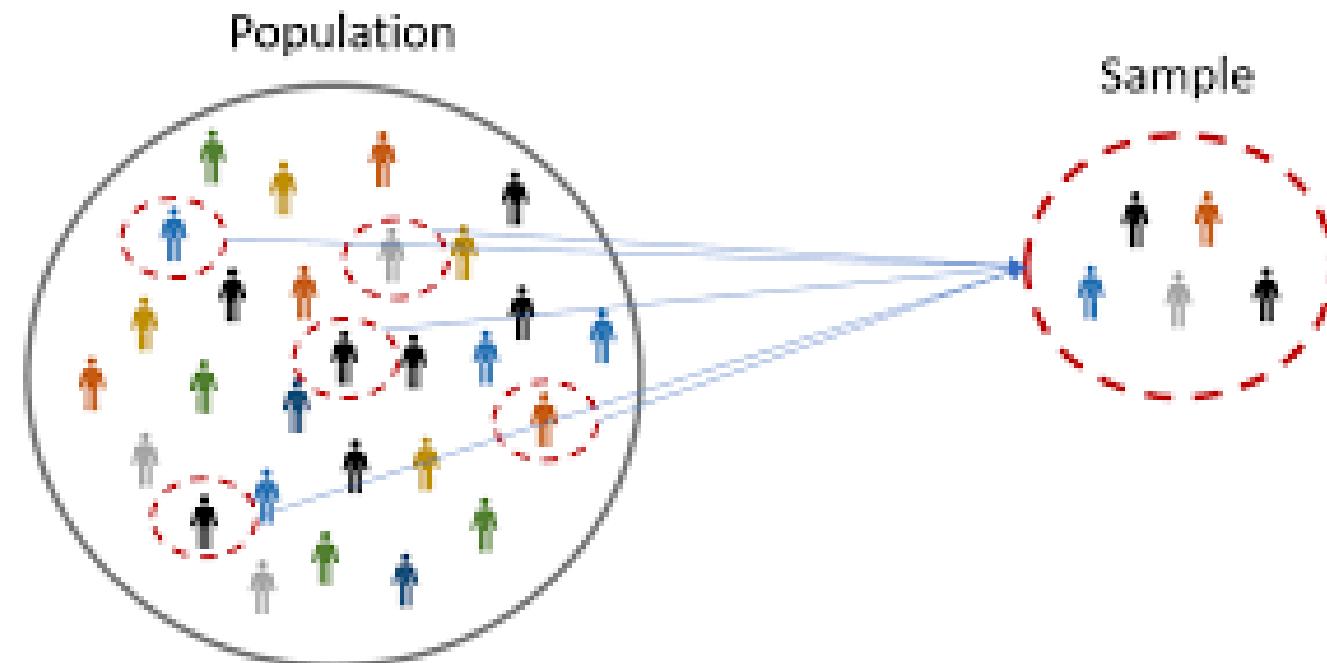

- How is construction defined/identified in national data?

Figure 1. NAICS and CPWR's Naming Structure

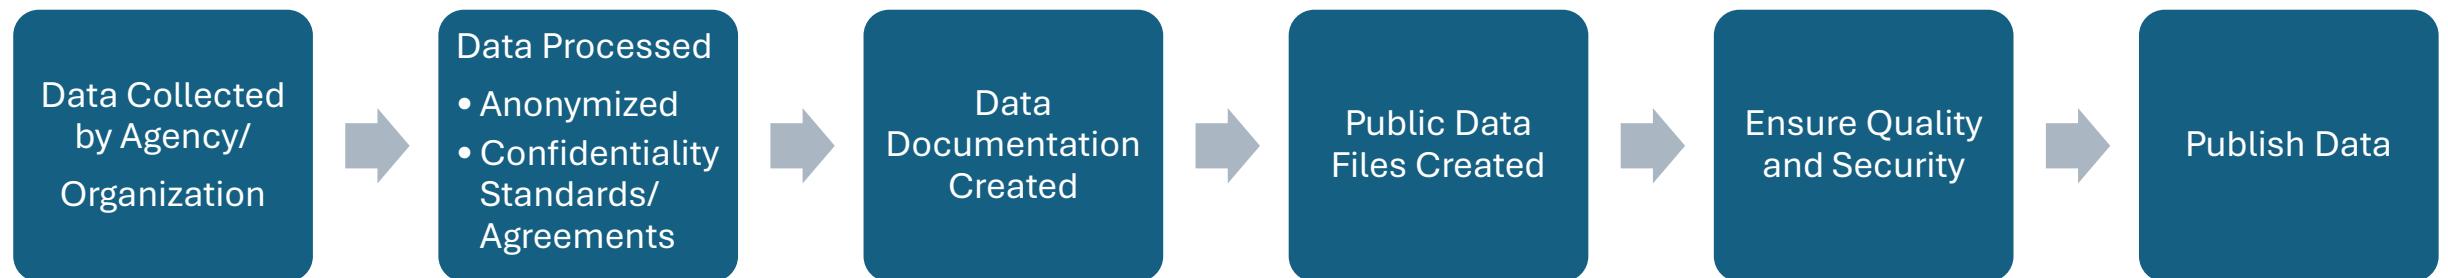

# Common Questions & Answers #4

- Why do you not always report trade/occupation level data?

# Common Questions & Answers #5

- Why is data often 1 to 3 years old?

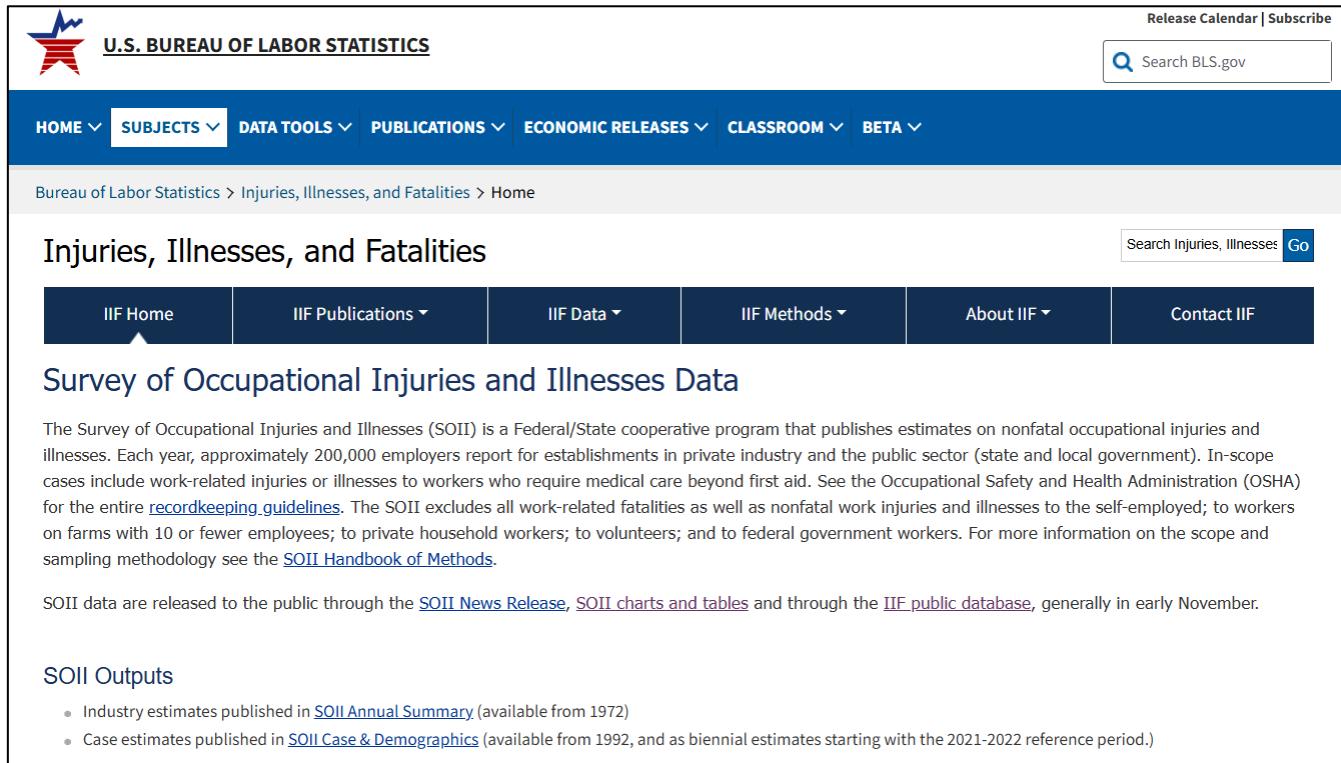

# Common Questions & Answers #6

- Is the data you use all publicly available? Is it easy to navigate/access?
  - Depends on:
    - Data Source
    - Individual Skillset/Familiarity with data sources and documentation
    - May required additional steps to pull construction out of national data

# Common Questions & Answers #7

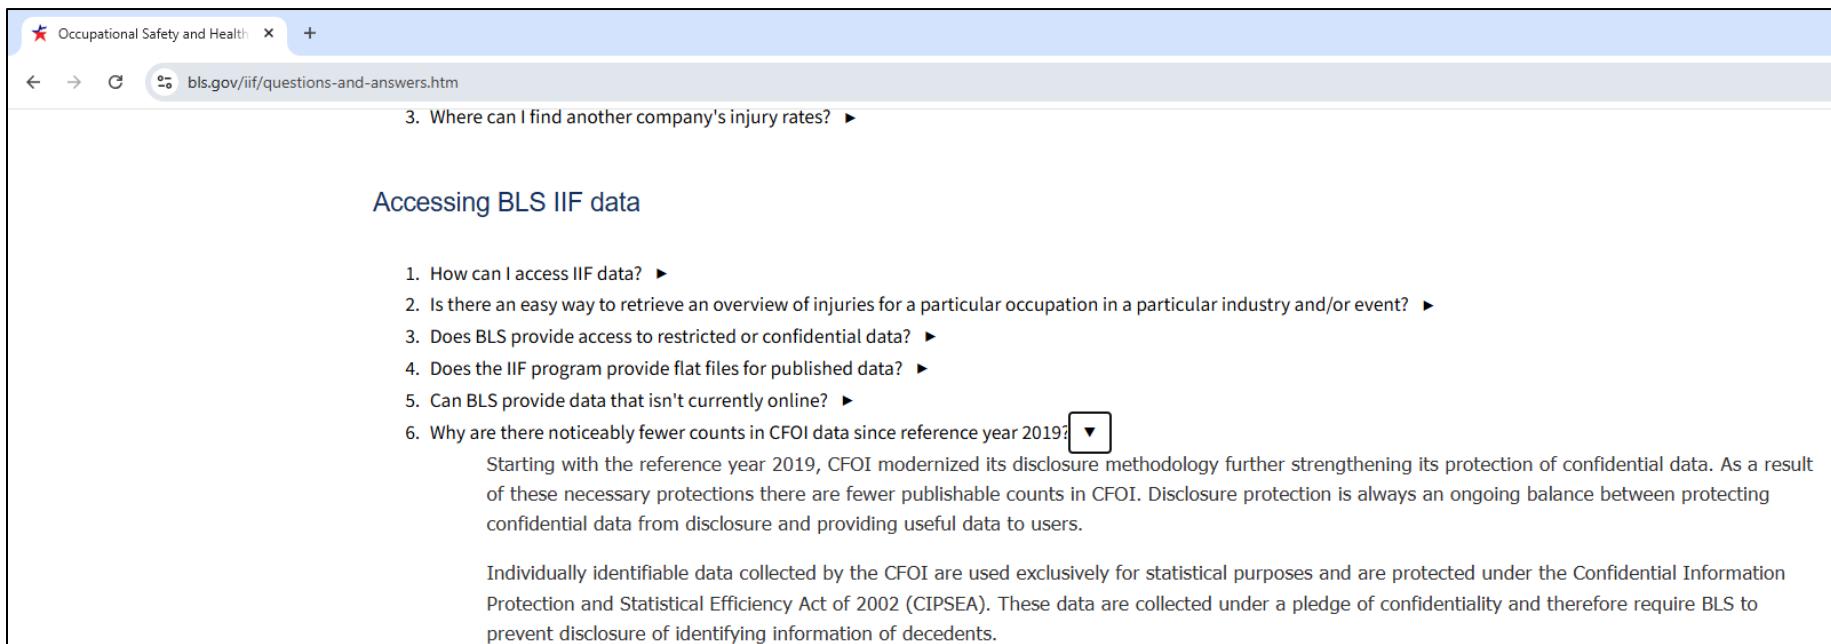

- Why do you report nonfatal injuries for two-year period while fatal injuries are annual?

The screenshot shows the official website of the U.S. Bureau of Labor Statistics (BLS). The header features the BLS logo and the text "U.S. BUREAU OF LABOR STATISTICS". The top navigation bar includes links for "HOME", "SUBJECTS", "DATA TOOLS", "PUBLICATIONS", "ECONOMIC RELEASES", "CLASSROOM", and "BETA". On the right side of the header are links for "Release Calendar" and "Subscribe", and a search bar with the placeholder "Search BLS.gov". The main content area is titled "Injuries, Illnesses, and Fatalities" and includes a sub-section for "Survey of Occupational Injuries and Illnesses Data". This section provides a detailed description of the SOII program, stating it is a Federal/State cooperative program that publishes estimates on nonfatal occupational injuries and illnesses. It mentions that approximately 200,000 employers report for establishments in private industry and the public sector. The text also describes the inclusion of work-related injuries or illnesses to workers requiring medical care beyond first aid, and excludes fatal injuries and nonfatal work injuries and illnesses to the self-employed, workers on farms with 10 or fewer employees, private household workers, volunteers, and federal government workers. It also refers to the "SOII Handbook of Methods". Below this, it notes that SOII data are released through the "SOII News Release", "SOII charts and tables", and the "IIF public database" in early November. A "SOII Outputs" section lists "Industry estimates published in SOII Annual Summary (available from 1972)" and "Case estimates published in SOII Case & Demographics (available from 1992, and as biennial estimates starting with the 2021-2022 reference period.)".

# Common Questions & Answers #8

- Why are we seeing less detailed injury statistics?

Occupational Safety and Health x +

bls.gov/iif/questions-and-answers.htm

3. Where can I find another company's injury rates? ►

Accessing BLS IIF data

1. How can I access IIF data? ►
2. Is there an easy way to retrieve an overview of injuries for a particular occupation in a particular industry and/or event? ►
3. Does BLS provide access to restricted or confidential data? ►
4. Does the IIF program provide flat files for published data? ►
5. Can BLS provide data that isn't currently online? ►
6. Why are there noticeably fewer counts in CFOI data since reference year 2019? ▾

Starting with the reference year 2019, CFOI modernized its disclosure methodology further strengthening its protection of confidential data. As a result of these necessary protections there are fewer publishable counts in CFOI. Disclosure protection is always an ongoing balance between protecting confidential data from disclosure and providing useful data to users.

Individually identifiable data collected by the CFOI are used exclusively for statistical purposes and are protected under the Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA). These data are collected under a pledge of confidentiality and therefore require BLS to prevent disclosure of identifying information of decedents.

# Common Questions & Answers #9

- Can I use your materials in a presentation, paper, proposal?

# Common Questions & Answers #10

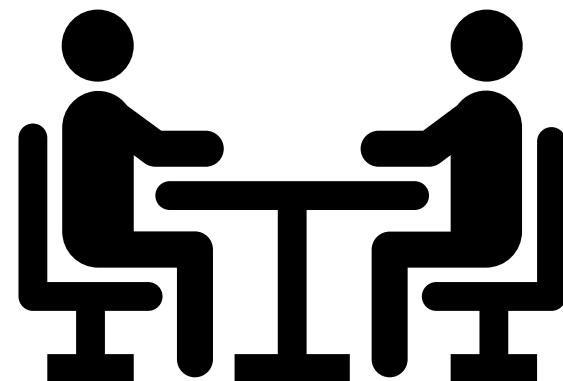

- Can you help me pull data or identify potential data sources?
  - We respond to data requests
    - Specific trade/occupation.
    - Content not included in our products.
  - Help individuals identify and navigate data sources to use for their own projects.

Email us directly or at [datacenter@cpwr.com](mailto:datacenter@cpwr.com)

# Common Questions & Answers #11

- What do you hope happens with your products?
  - We hope our products are used to make workplaces safer through reducing jobsite hazards and exposures. For example,
    - Employers developing policies that address hazards and exposures
    - Employees learning about hazards/exposures
    - Individuals using findings to guide their research efforts or intervention/prevention efforts
    - Policy makers using findings to support evidence-based decisions

# What CPWR Data Center questions do you have?

# CPWR Data Center Survey 2026

- CPWR's Data Center is seeking your feedback to better understand how our products support the industry's data needs and their overall usability. Through a short survey, we aim to gather insights on what's working well, identify gaps, and learn how we can improve. Your input will help guide future enhancements and ensure our data resources continue to meet the industry's evolving needs.
