**Be A Leader In Safety – Join Us In Celebrating the
First US Industry Safety Week!**

Every year, more than 80,000 workers suffer an injury on construction job sites across the U.S. Any one incident is one too many. Life is too precious to not make safety the number one focus in the U.S. construction industry.

That's why thirty one national and global construction firms comprising The Construction Industry Safety (CISI) group and the Incident and Injury Free CEO (IIF) Forum have joined forces with a single aim: to inspire everyone in the industry to be leaders in safety.

We know being safe every day on every job site crosses competitive boundaries. That's why we have banded together to create and celebrate the first industry-wide Safety Week, running this year from Sunday May 4 to Saturday May 10.

This effort in our industry presents a unique opportunity for construction firms across the U.S. to work together to eliminate worker injury.

We can all be leaders in keeping our workforce safe – no matter where you are located, your company size or your role in our industry.

Our collective mission for Safety Week 2014 is to partner together in:

- Thanking our workers for supporting safety and recognizing their efforts to be injury free
- Increasing awareness of the importance of being committed to safety, every day
- Inspiring all of us to share best practices and to work together to strengthen our industry's safety culture
- Celebrating the need to be injury free
- Conducting on-site safety awareness activities to support education

If you are interested in celebrating Safety Week, visit www.safetyweek2014.com for ideas on how to conduct your own safety week (website under construction until March 1st, 2014).
