COVID-19 VACCINE FACT #1

The vaccine **<u>cannot</u>** make you sick with COVID-19.

None of the authorized and recommended COVID-19 vaccines or vaccines currently in development in the United States contain the live virus that causes COVID-19. **This means that the vaccine <u>cannot</u> make you sick with COVID-19.**

There are several different types of vaccines in development. All of them teach our immune systems how to recognize and fight the virus that causes COVID-19. Sometimes this process can cause symptoms, such as fever. These symptoms are normal and are a sign that the body is building protection against the virus that causes COVID-19.
