

Research Analyst

CPWR - The Center for Construction Research and Training (www.cpwr.com) is a non-profit organization located in Silver Spring, Maryland. CPWR is funded by the National Institute for Occupational Safety and Health (NIOSH) and is currently the NIOSH-supported National Construction Research Center, and is also funded by other federal government agencies in support of its construction industry research, service, and training programs.

The Research Analyst position involves analyzing large national datasets, summarizing statistical results, preparing presentations and other graphical representations, and drafting reports, briefs, and articles for publication and dissemination. The candidate must possess excellent research, synthesis, and writing skills; strong analytical and critical thinking background; high attention to detail; and the ability to organize work projects and complete tasks in an efficient and timely manner. Knowledge of statistics and statistical packages is required (SAS preferred). Proficiency in word processing applications such as MS Word, Excel, PowerPoint, and other software applications is essential. Public health training or experience is highly desirable, as is knowledge of the construction industry.

The candidate must have at least a master's degree with a quantitative emphasis such as epidemiology, public health, statistics, or other related field. Relevant job experience is a plus.

Salary is commensurate with experience. Excellent benefits package. Equal opportunity employer.

If interested in this position, please send a résumé and cover letter to: jobpostings@cpwr.com. No phone calls please.
